VICON

Integrated Security Solutions for Safer Schools

Custom-Designed to Make K-12 Schools and Campuses Safer

Reputation

When it comes to safety, schools need all the help they can get, which is why—for over 55 years—Vicon has been delivering custom-designed security solutions to meet the unique needs of schools of all types and sizes.

Security

We don't have to convince YOU that physical security is a critical tool for campus safety. It helps protect students, deter crime, prevent vandalism, mitigate risk, and reduce false liability claims.

Innovation

There have been huge advancements in surveillance technology in recent years, and it's vital that security professionals are aware of how this new technology can provide more comprehensive protection for their stakeholders.

K-12 schools all over the world trust Vicon because our solutions can:

Safeguard your entire campus while complying with local and federal laws and regulations.
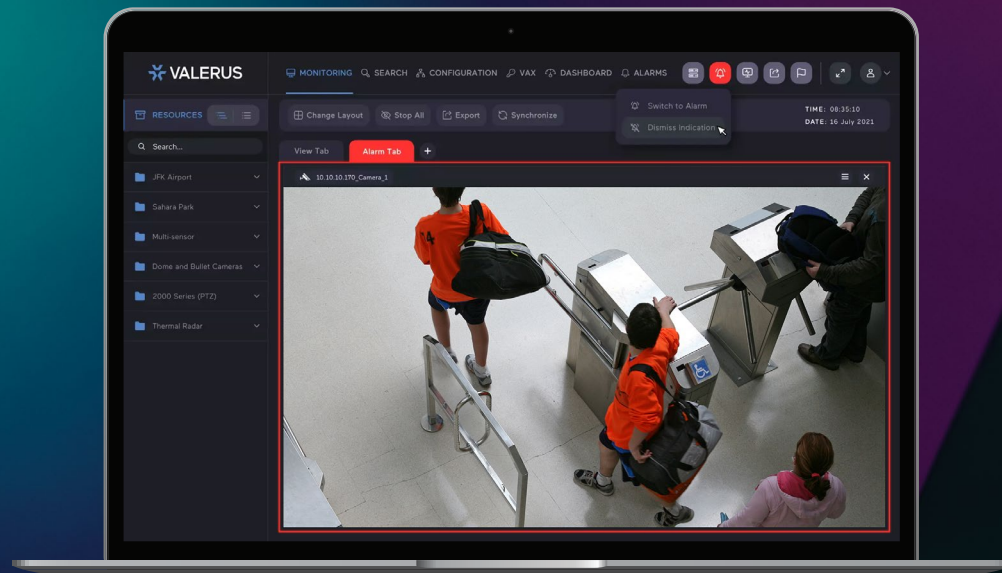

Deliver real-time alerts to notify you of critical events so you can take immediate action.

Deter unwanted activity, like vandalism, trespassing, bullying, fights, etc.

Quickly locate incidents so you can review and export evidence for thorough investigation.

A Single, Unified Security Management Platform

A robust, end-to-end security solution is essential to the safety and security of your students, teachers, staff, and visitors. It lets you manage everything as one unified system, optimizing your security operations locally, campus-wide, and district-wide.

When you standardize on a Vicon-only solution, you can control your video, access control, and even third-party applications like Omnilert® gun detect, and Halo® vape and aggression detection, directly from the Valerus VMS.

Click or scan to see how Omnilert instantly triggers an alarm in Valerus when it visually detects a firearm.

Proactively Detect Potential Threats and Quickly Investigate Conflicts

Monitoring and reviewing video surveillance can consume resources that many schools just don't have. With "object classification," however, schools can react quickly to potential threats, and investigate on-campus conflicts effectively and efficiently.

- Diminish nuisance motion-triggered alarms, while detecting real-time infractions like loitering, trespassing, and ditching.

- Filter out non-relevant video for faster incident and conflict resolution.

- Reduce storage requirements by limiting recording to just object-based motion.

- Respond to genuine threats quicker, and with fewer resources.

Click or scan to see how quickly you can find the vandalism in action.

Prevent Unwanted Occupants from Entering, and Improve Building Automation

Vicon's VAX Access Control solution gives you better regulation over who enters your school's buildings, and allows you to apply tighter restrictions to sensitive areas like labs and administration offices.

Touchless mobile entry allows employees to access your facilities via a smartphone app for a green, plastic-free solution.

The flexible scheduler easily accommodates an ever-changing school calendar, including the option to schedule a one-time event (like an evening concert), then automatically revert back to the regular schedule.
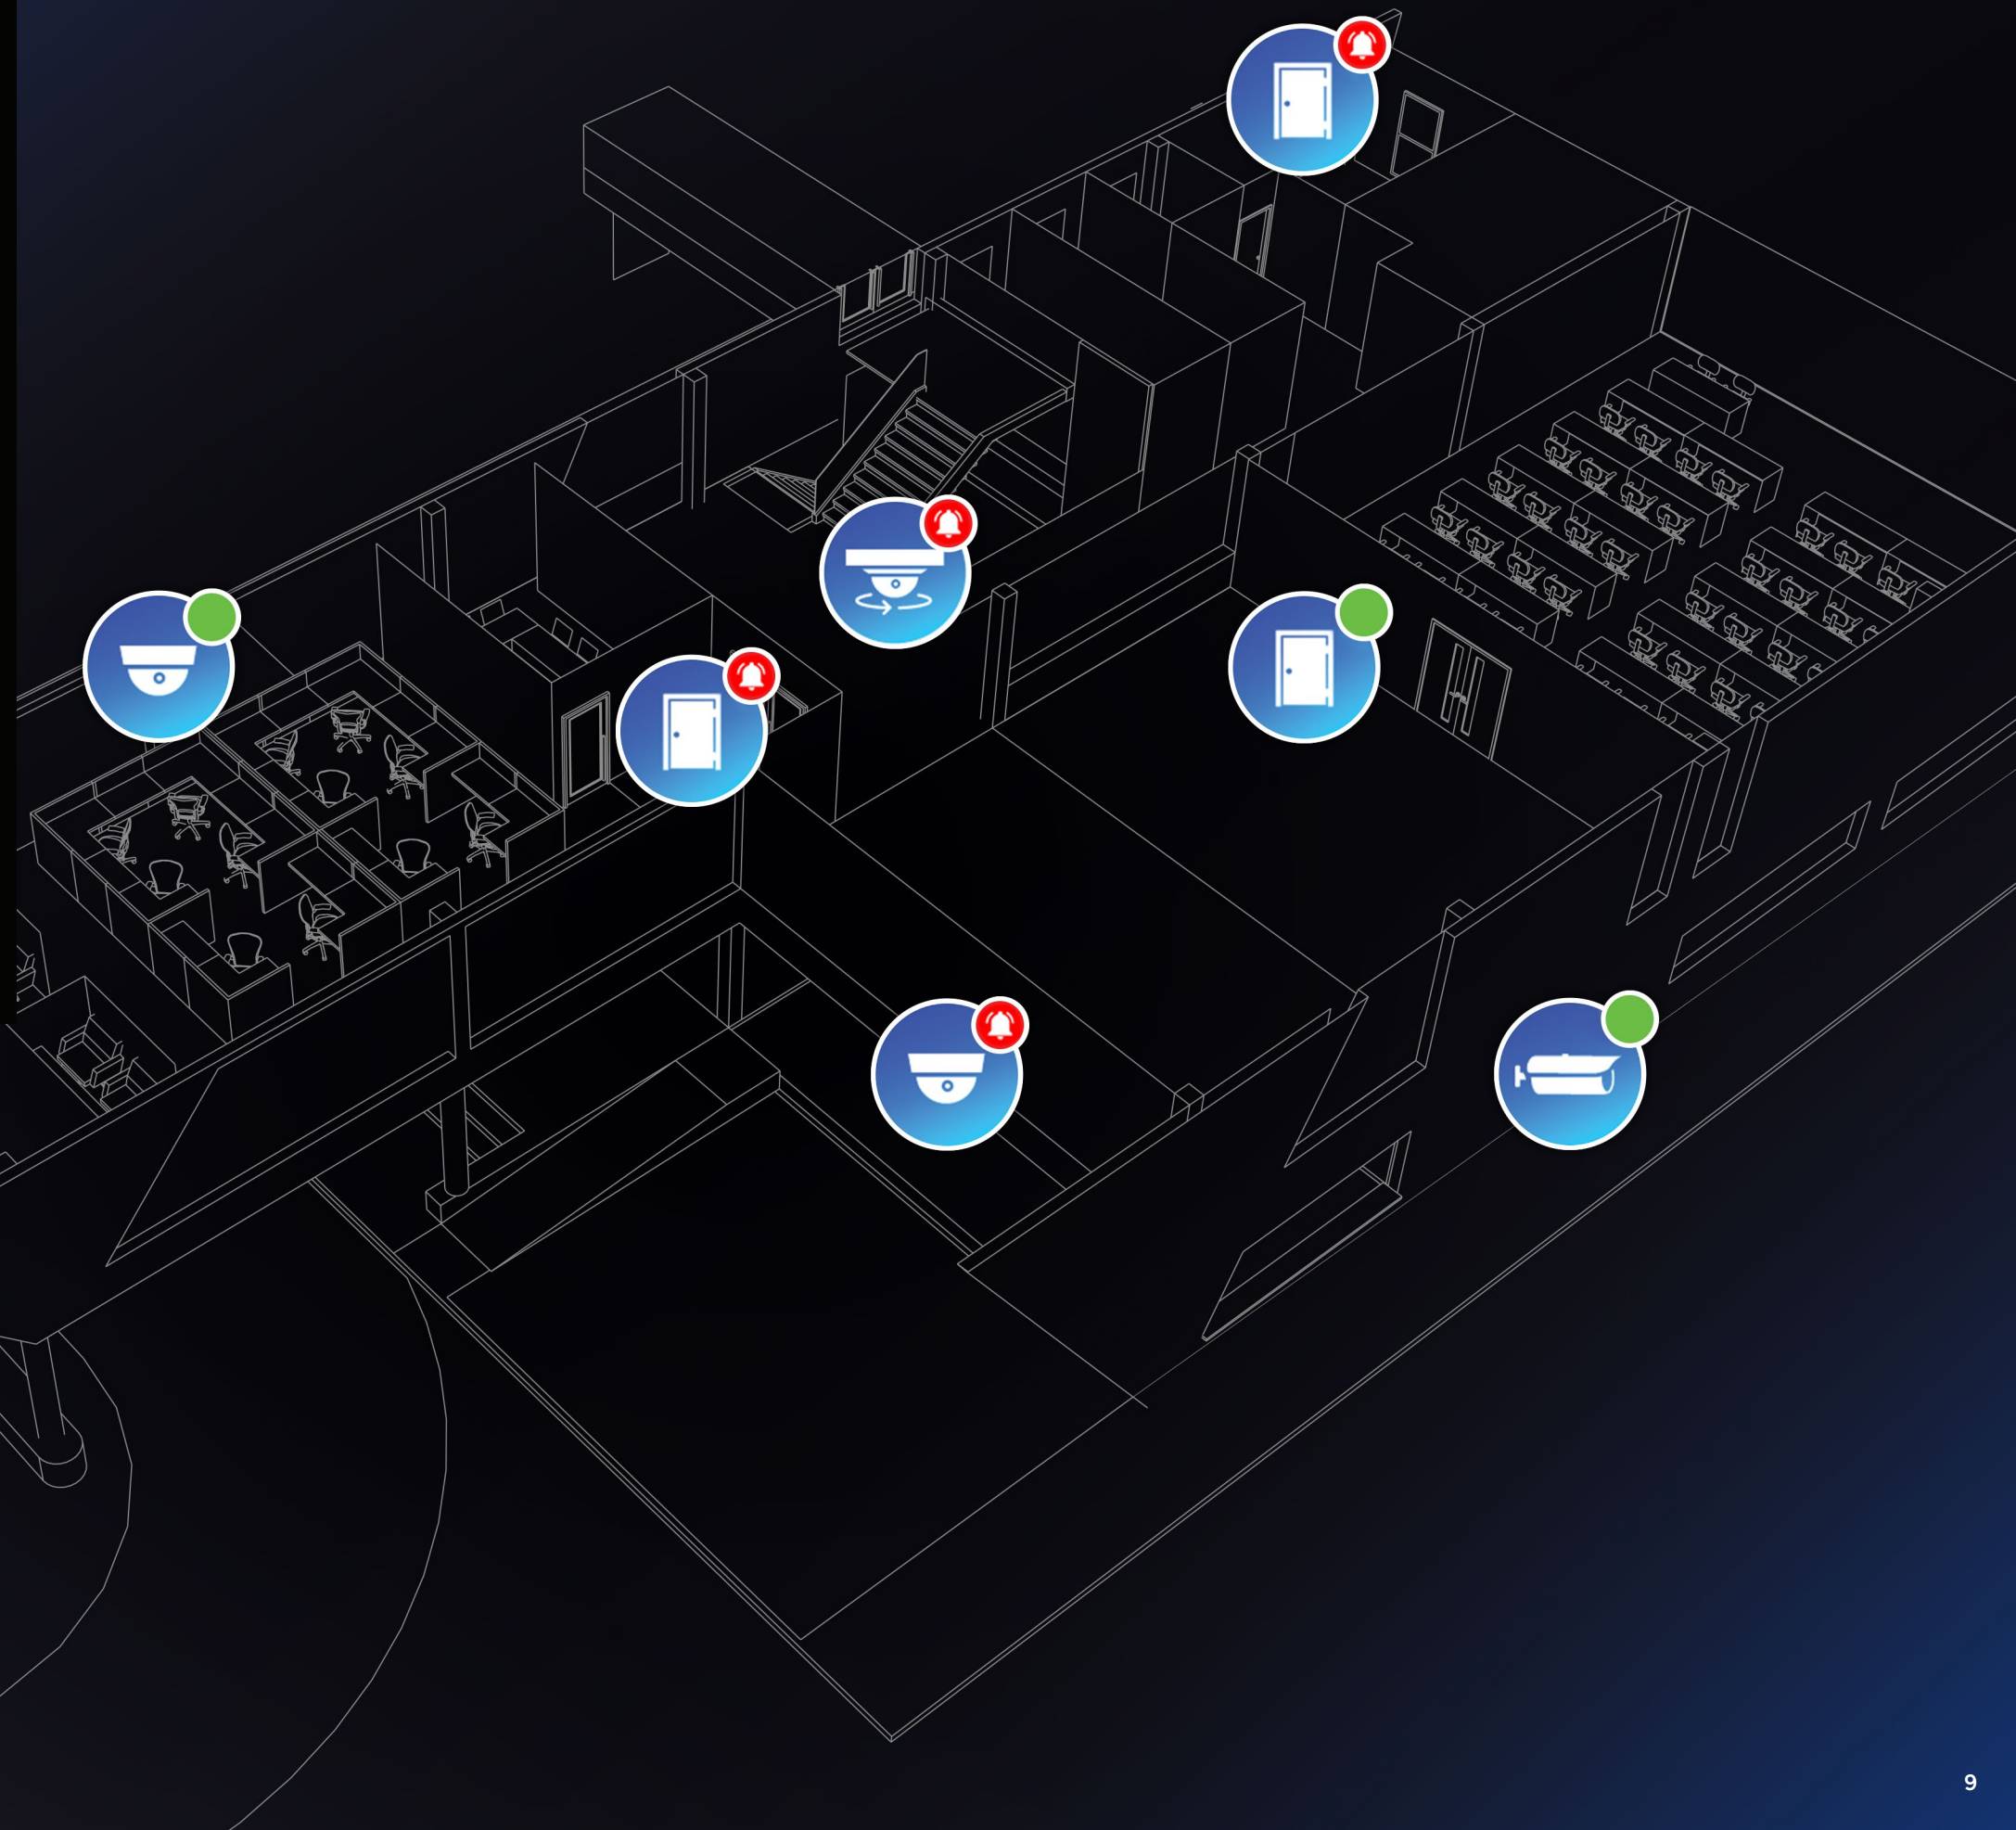

Authorized visitors—for example parent helpers—can receive a web link that grants them temporary access to a specific door.

Get Real-Time Situational Awareness with Interactive Maps of Your School

Better visualize your security operations via floorplans and maps of your buildings and campus. The interactive nature of these maps lets you control a variety of components (e.g., door strikes and camera movements) via icons overlaid on those maps.

- Get instant notification of alarms and visually pinpoint their exact location.

- Watch live or recorded video right from the map.

- Visually track active scenarios that show all system components—from intrusion events to facial recognition events to noise detection and live video—all working together in real-time.

Campus-Ready Products, Ready for Action!

School campuses can be a tough environment, with challenging conditions. Vicon has planned ahead for that. Our intelligent, durable camera portfolio offers a number of advantages.

Vandal-proof cameras will notify you when someone attempts to silly string or spray paint them.

Rugged housings protect the cameras from extreme temperatures, high humidity, dust, and water (and snowballs!).

Smart infrared technology lets you see in near darkness.

Intelligent analytics alert on things like loitering, motion, and intrusion detection.

Two-way audio lets you scare off potential culprits and remind them they're being watched.

Get seamless integration with access control, fire & intrusion alarms, and other campus security equipment.

Automated Responses to Countless Scenarios Campus-Wide

You can trigger a myriad of automated actions in response to any event that's important to you. And you can customize these actions ahead of time for your unique needs. For example:
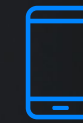

- Receive daily emails listing all employees who have not entered the building by 9AM, or who have not exited by 5PM.

- Automatically retrieve muster reports; for example, in the event of a fire evacuation, you'll be alerted as to where every employee is, complete with their location on the map of your facility.

- Instantaneously lock down your entire facility in the event of an emergency.

Click or scan to see real-world applications for Action Plans.

Check In On Your Campus from Wherever You Are

Our free mobile app lets you view live and recorded video of your schools, classrooms, and campuses—remotely—from your smartphone or tablet.

Use your smartphone to see who is in the building before entering, or to make sure everyone has exited before locking up.
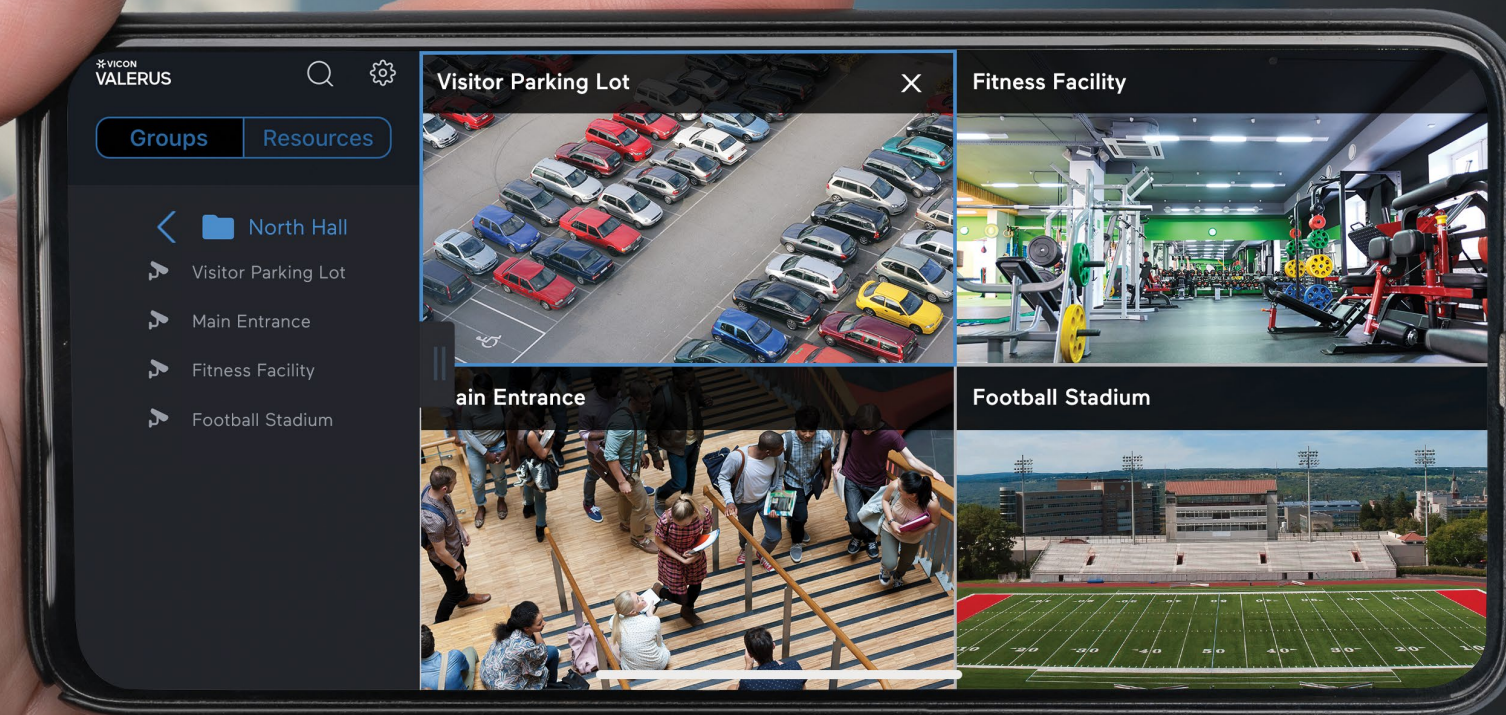

Remotely conduct a "virtual patrol" to assess a situation before acting.

Make sure employees get to their cars safely at night.

Get push notifications about events that are important to you, e.g., an intrusion event.

Why Your School's IT Department will Love Vicon

We know your IT Department will be heavily involved in the selection, planning, deployment, and maintenance of your school's security system. Here are just a few reasons why IT departments love Vicon.

- Our team of Sales Engineers will work hand-in-hand with your IT department to make sure the solution meets their requirements.

- Our stringent cybersecurity testing and complete end-to-end encryption let you rest assured your video and data are protected and secure.

- Our security equipment has been optimized to reduce storage and bandwidth requirements, and to comply with your network guidelines.

- Our 24/7 tech support—with techs in your time zone—is renowned for its expertise, live interaction, and fastest response times in the industry.

Safeguarding Your Budget

Did you know that after 5-10 years, your security system's total cost of ownership could conceivably be ~50% lower from one manufacturer to another?

~50%↓

Vicon knows schools don't have huge spending budgets, so we've taken into consideration factors like licensing fees, mandatory/annual upgrades, tech support fees, factory warranty terms and the potential trappings of subscription-based offerings—all to help you reduce your system costs over time.

We Integrate Video Surveillance and Access Control to Address Your Unique Concerns

Access Control

Gun Detection

**Video**

Audio

Analytics

Alarm

Sensor

Be alerted in real-time if a gun is detected on campus, and see the video of the perpetrator.*

Control access to—and monitor—your doors and access points, inside and out.

Be notified about instances of potential distress, like cries for help, aggression detection, and even gunshots.*

Your labs contain expensive equipment; make sure it's protected.

Make sure hallways are gated off for evening events, and monitor for safety.

Check in on your parking lots to make sure they're safe, well-lit, plowed, etc.

Ensure safety and protocol guidelines are being followed in the weight room.

Observe traffic and activity in hallways and stairwells, and use 2-way audio to discourage potential misconduct.

Get real-time alerts about the detection of vaping, including THC and vape masking.*

Get an alert—complete with video—when someone enters a sensitive area, when groups of students are loitering, or when motion is detected after hours.

Monitor activity in and around stands, snack bar, equipment shed, scoreboard, etc.

*Via a seamless integration with industry-acclaimed 3rd party integrations.
