Roughneck AI Bullet Camera

NDAA GSA Onvif
S/G/T/M TAA

Overview

For customers who need to monitor activity in a variety of lighting conditions, from bright light to complete darkness, this bullet camera integrates IR LEDs, True WDR, and Starlight low-light technology, to guarantee superior image quality, regardless of lighting. And the bullet form factor guarantees a water-tight installation.

AI ANALYTICS INSIDE

Perform more meaningful post-event forensic searches with object classification analytics

The camera's object classification analytics allow it to distinguish people and vehicles from other objects in a scene. Object-only recording, and the ability to filter out "environmental noise" that can trigger a motion detection alarm (e.g., shadows, swaying trees and bushes, etc.), significantly increases operational efficiencies. The result?

- Filter out non-relevant video for faster incident resolution
- Reduce storage requirements (by limiting recording to just object-based motion)
- Diminish nuisance alarms
- Respond to genuine threats quicker, and with fewer resources

Product at a Glance

- 5 MP resolution
